H-83

Description of Type Design Change:

Installation of Replacement Heater Lines

**Installation/Operating Data,
Required Equipment and Limitations:**

Installation of Replacement Heater Lines is to be performed in accordance with the RAMM Aerospace Inc. Master Document List MDL-RH350-1017 Revision - dated March 24, 2018 or later Transport Canada approved revision.

Installation of Replacement Heater Lines is to be maintained in accordance with the RAMM Aerospace Inc. Instructions for Continued Airworthiness ICA-RH350-1017 Revision 0 dated March 24, 2018 or later Transport Canada accepted revision.

Note:

1. Installation of this STC can only be performed on aircraft that have been modified by Airbus Service Bulletin 21.00.06 (Valve relocation to allow for the installation of the twin bench seat).
2. Effective January 15, 2024, the name of the holder was changed from RAMM Aerospace Inc. to Boost Human External Cargo Systems Inc.

– End –

Conditions: This approval is only applicable to the type/model of aeronautical product specified therein. Prior to incorporating this modification, the installer shall establish that the interrelationship between this change and any other modification(s) incorporated **will not** adversely affect the airworthiness of the modified product.
