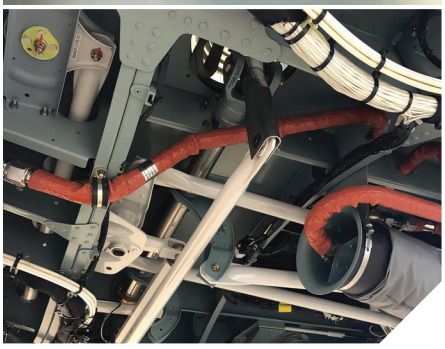
AIRBUS H125/AS350 REPLACEMENT STAINLESS STEEL HEATER LINE KIT

Request A Quote



The **Boost Replacement Heater Line Kit** offers a high-quality upgrade by providing insulated, stainless steel pipes that serve as direct replacements for the aluminum OEM parts. This comprehensive kit includes everything needed for installation, such as pipes, adapters, clamps, and fasteners. It seamlessly interfaces with the existing control valve and P2 hose from the engine, ensuring a smooth installation process.

Key Features:

- **Stainless Steel Pipes:** Unlike the original aluminum parts, our stainless steel pipes are designed for superior durability and longevity.
- **FLARED AN818 Coupling Nuts:** The kit features FLARED AN818 coupling nuts, offering enhanced reliability over the standard compression fittings.
- **Comprehensive Installation Kit:** All necessary components, including adapters, clamps, and fasteners, are provided to ensure a hassle-free installation.
- **On-Condition Replacement:** The RH350-1017-101 kit is certified to be replaced “On Condition”.

Weight: 8 lbs / 3.63 kg
Installation Time: 4 hours
